

Tower Tech® Cooling Tower Project Profile

STIHL® Manufacturing Requirements:

- “...provide a reliable and energy-efficient cooling tower for their newest climate controlled Accessories Facility that provides critical high-speed and high-volume component manufacturing...”

STIHL® – Virginia Beach, VA

- Uses a Tower Tech model TTXE-061975 six-cell Cooling Tower.
- Provides 1,626 GPM cooling capacity for (2) large Water Cooled Chillers as well cooling for quenching operations in production manufacturing cells.
- Fans operate through VSD motor control to provide the lowest possible \$ kW/ton™ in the industry
- FRP & Stainless Steel components means no corrosion of Tower over time.
